

Visitor scheduling app.

Begüm Karaböce

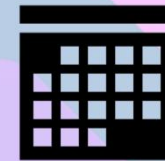

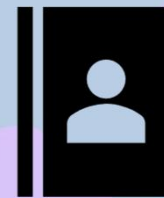

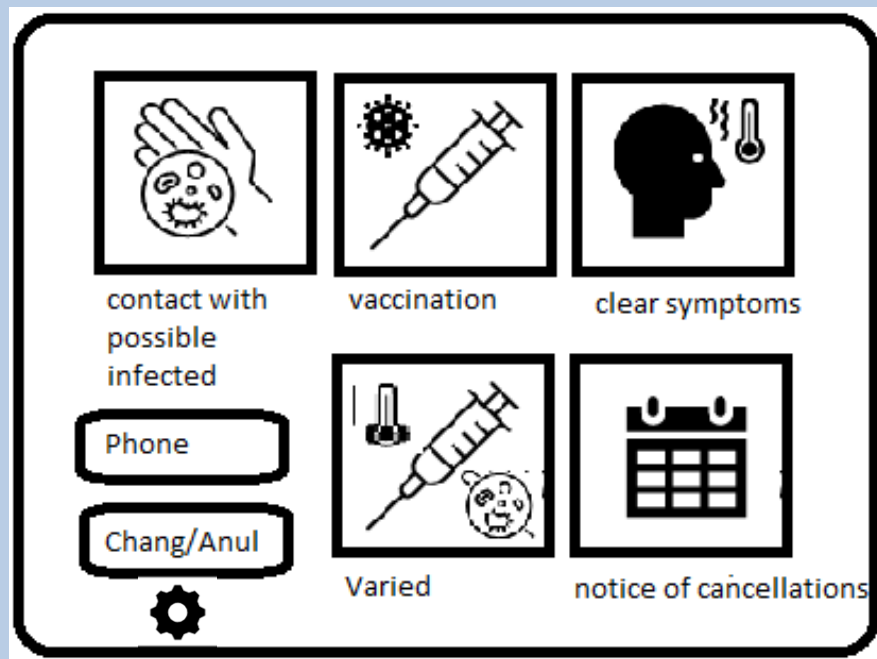

Juan Carlos Ramírez

Joel Camerino

A functional app.

- Set appointments according to the degree of exposure and CoVid-19 symptoms
- Double automated reminder of the appointment one week before and one day before
- Storage of applicants' personal data
- Automated appointment modifications to change the day for possible cancellations of other users
- Acces to useful phone number

With a simple and clear interface

Points to consider

- Maximize interface functionality
- Achieve autonomus administration
- Consider all important aspects
