Covid Cases

Symptoms

Settings

Symptoms

Mild: Low-grade fever (around 100 degrees Fahrenheit), dry cough, headache, new loss of taste or smell, fatigue, vomiting and diarrhea

Moderate: Fever (>100.4 degrees Fahrenheit), chills with repeated shaking, deep cough, fatigue and body aches, muscle pain, general feeling of being unwell, shortness of breath

Severe: Shortness of breath, chest discomfort, confusion/unresponsiveness, trouble staying awake, eye problems such as watery eyes or swollen eyelids, bluish face/lips (a sign you're not getting enough oxygen)
